

Choosing Your Squeeze Chute

Powder River built the first all steel squeeze chute in the 1940's and continues leading the way in squeeze chute innovation and design. This packet will assist you in deciding which chute makes the most sense for your particular operation.

Things To Consider When Selecting Your Squeeze Chute

A person wearing a purple jacket and a dark hat is riding a brown horse through a herd of cattle in a green field. The person is looking towards the camera. The cattle are of various colors, including black, brown, and white. The background is a lush green field with some trees in the distance.

1. Herd Size
2. Size of Cattle
3. Budget
4. Horned Animals
5. Types of procedures performing
6. Self-Catch or Manual Head Gate
7. Amount of help available
8. Location
9. Neck Access
10. Adjustability
11. Portability

Rancher Hydraulic Chute w/Pivot Arm

Order # 003-40020

The Rancher Hydraulic Chute with Pivot Arm works great for any herd size. If the budget allows, this is the way to go.

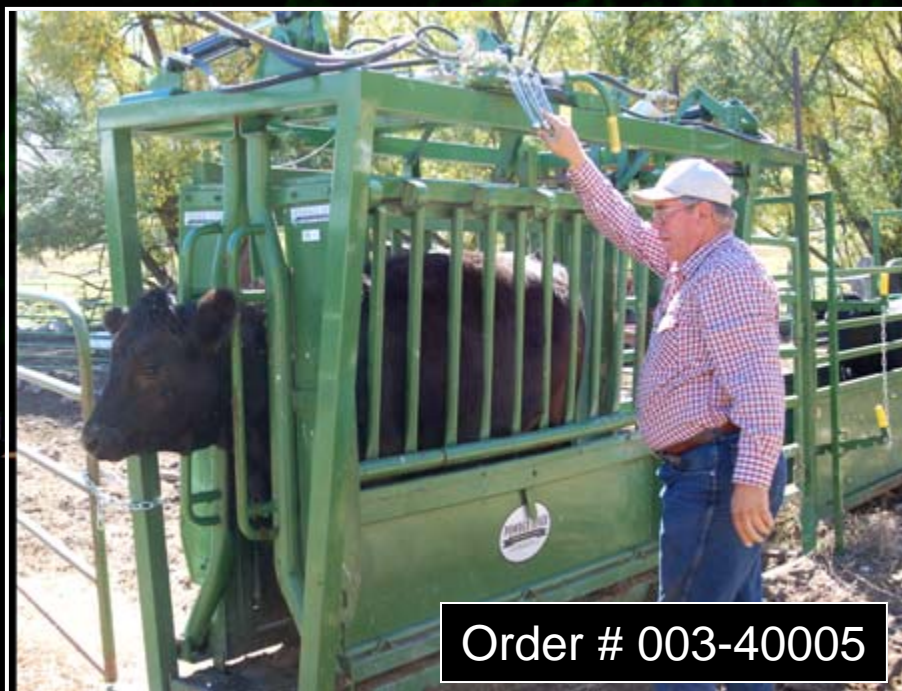

Built for the Cow / Calf Operator

- Designed for the average rancher
- Runs off 110 or 220 volt power
- Live head gate moves with squeeze side adding to ease of animal control
- Pivot arm allows you to decide where you want your control levers
- Portable wheel kit available
- Right side opens fully for animal exit
- Squeeze sides adjust manually to handle from calves up to large bulls
- Curtain style sheeted tail gate keeps cattle in the alley from seeing what's going on in the chute
- Side pipes drop down for easy access to the side of the animal on both sides of chute
- Removable kick panels on each side for easy access to legs and feet
- Factory set pressure relief valve for animal safety
- Adjustable Neck Extender reduces movement of the head & neck area and gives easy access to the neck for injections

Rancher XL Stabilizer Chute

Order # 002-30000

The Rancher XL Stabilizer Chute is the right chute if working on the head and neck area is a priority

The Chute with a Calming Influence

- Patented Stabilizer Shoulder / Head Catch provides optimum control of the animal by providing a second point of contact on the animal's neck – also works as a manual head gate for horned cattle and smaller calves
- 9 1/2" opening between the dual head gates gives ample room for neck access
- Self-Catch Head Gate is nice if working alone and having to work the alley. Just set it and animal's shoulders push it locked.
- All steel construction, V-pattern sides for even pressure, drop down bars on both sides for easy side access, removable kick panels, sheeted split tail gate keeps cattle in the alley unaware of what is going on in the chute
- Will work for any herd size

XL Chute w/Self-Catch Head Gate

Order # 002-20056

The XL Chute w/Self-Catch Head Gate lets you work the alley and not have to be at the head gate.

Catch Them Every time with the Self-Catch Chute

- Self-Catch Head Gate can be adjusted to catch any size of cattle
- V-Pattern squeeze provides even pressure on animal to keep them in a balanced upright position while being worked
- Right side of chute swings open if the animal hesitates exiting out the front or if one goes down in the chute
- Drop side pipes allow animal access from both sides of the chute for vaccinating, branding, pour-on, etc.
- Self-Catch Head Gate is not designed for horned animals
- Nose tongs included for holding head still for ear tagging, implants, etc.

XL Manual Chute w/Right Side Exit

Order # 002-10052

The XL Manual Chute w/Right Side Exit is Powder River's most durable, low maintenance chute.

Catch Any Size of Cattle with the XL Manual Chute

- Head Gate, Center Squeeze, Split Tail Gate controlled from one position enabling one-person operation
- Right side swings fully open for animal exit if necessary
- Drop side pipes allow animal access from both sides for vaccinating, branding, pour-on, etc.
- Tail Gate locks open, allowing one-person operation of the tail gate while working animal in the chute
- Designed for cattle up to 2500 lbs.
- Positive locking side exit latch prevents side exit from accidentally opening
- V-Pattern squeeze provides even pressure on animals to keep them in a balanced upright position while being worked
- Kick panels are removable for easy access to feet. Kick panels are very heavy gauge steel to reduce noise
- Optional neck extender available for more head and neck control
- This chute is a great investment / holds value
