			1" Sch. 40 Pipe

## 12-foot, 48-inch Feeder Panel

These 48-inch, 14-gauge Feeder Panels are an extremely economical and versatile way to feed your animals. With wood-to-panel connectors or single clevises, they can be installed anywhere.

## Square Bale Feeder Order No. 040-00025

Powder River's Classic Square Bale Feeder will allow you to conserve feed by keeping cattle from trampling it into the ground. The Square Bale Feeder consists of 2-6' Classic Feeder Panels and 2-10' Classic Feeder Panels, a perfect size for one ton bales. The slant bar design keeps the heads of the cattle from pulling out as easily. This keeps any dropped feed inside the feeder. As cattle eat away from the bale they will increase pressure on the panels. The Square Bale Classic Feeder will handle that pressure. Powder River's Classic Square Bale Feeder pins together in minutes with our popular pin and clip system.

## 10-foot Slant Bar Rack Feeder

Powder River's all-steel cattle feeders are renowned for their strength and quality. Durability and feed-saving design are important features to consider before you buy. Our feeders are built with a sturdy 14-gauge, one-piece box construction. The skirts are made from 13-gauge, 1.66-inch O.D. tube frame.

## Slant Bar Round Bale Feeder

Our Slant Bar Round Bale Feeder is a great value. The panels are made from 16-gauge, 1.66-inch tube. The 18-inch high pan is made from one single piece of 16-gauge sheeting, which means you get a stronger, more durable feeder for your money. Improved panel connectors allow feeder to be easily and quickly assembled with just three bolts. This feeder is available with or without legs.

## Water Troughs

These water troughs are constructed of 14-gauge steel with rolled-top edges and smooth welded corners for protection of the animal. Our troughs are approved and used by many state and federal agencies. We now have hot-dipped galvanized troughs available for extra protection that will carry a 10-year limited warranty.

*(Painted troughs will continue to be available, but will not carry a warranty).*

## 5-foot V-Rack Feeder
